To extend QKD applications to fiber-to-the-home optical communications, such as gigabit-capable passive optical networks (GPONs).

### Gigabit-capable Passive Optical Networks [Book]

The GPON protocol network provides optical fiber cabling and signals to the home and office using a point-to-multipoint scheme. GPON data rates of

The bit block contains a 2-bit sync header and bit data payload. The byte serializer forwards the least significant word first followed by the most significant word. Options for Future Optical Access Networks.

The drivers behind the modern passive optical network are high reliability, xN clock lines extend the clocking reach of the x6 clock line to all channels within the same side of the device.
