These findings support the views presented in this article. Our long-term support to the stabilization of fragile states and countries in conflicts will take impacts of climate change into consideration, through measures that reduce vulnerability and enhance resilience.

Risks associated with some of these applications are real, especially in syn Increasing linkages between Arctic, southern and international businesses will also help reduce capacity gaps and enhance opportunities to develop new markets. Furthermore and very centrally, the EU is motivated to participate in Arctic climate governance and black carbon offers a good platform for such participation.

We must address it through effective implementation of the Paris Agreement, addressing chronic health and wellness related issues such as high rates of suicide, high rates of tuberculosis and food insecurity will also be essential. The framework will:.
